

## FAQs - Continued

Psychological Testing Consultants supports families in identifying placements following testing. Usually it is our advocate or the family's attorney that takes the lead role in exploring placement options. We also conduct comparative special education program evaluations to assist families and 3rd party payers in making the final decision on a placement.

Our evaluations also assist older adolescents with high school to college transition planning as well as eligibility determination for educational accommodations and disability services. Finally, we also provide evaluations for Nonstandard Testing Accommodations (NTA) for college placement examinations, graduate and professional school entrance examinations, and state licensing examinations.

### **What questions can advocates answer?**

Are your child's unique needs fully understood from both a clinical and educational perspective? Is your school doing all it should to meet those needs? What legal rights do you and your child have? How do you exercise those rights? What must you do to make sure your child receives all the educational support to which they are entitled?
